DETAILED ACTION

Election/Restrictions

Claims 6-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper dated June 12, 2003.

Applicant's election without traverse of Invention of claim 5 is acknowledged.

Drawings

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 2-7-01 have been approved. A proper drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The correction to the drawings will not be held in abeyance.

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the holding and the fixing said fix end of the lower portion of said pulling glass member body by said first holding member (third to last paragraph of claim 5) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The third to last paragraph of the claim requires holding and fixing the "fix" end of the lower portion of the pulling glass member by the first holding member. However, The claim already requires that lower portion being fixed and held by the SECOND holding member. Further the claim also requires the FIRST holding member to be holding and fixing the extension optical fiber glass body.

Examiner could not find any discussion in the specification which further describes this aspect of the invention, nor does any drawing show this. Claims are to be interpreted in light of the specification, but Examiner cannot find any discussion which sheds sufficient light on the present invention.

Also in claim 5: Line 8 of page 48 of the refers to "said pair". There is no antecedent basis for this term. Line 16, there is no antecedent basis for "said pair of axial center holding members."

Art Unit: 1731

Conclusion

The prior art does not have the first holding member fixing and holding the lower portion of a pulling glass member body - therefore no prior art rejection is appropriate. However, due to the rejections under 35 USC112, no indication of allowable subject matter is made at this time.
